EDITORIAL BOARD

Chairman

Dr R. M. Miller, Vice President Research & Development, Unichema International, Gouda, The Netherlands

R. Cornelis, Gent, Belgium

S. J. Haswell, Hull, UK

A. Manz, London, UK

H. S. Minhas, Cambridge, UK

B. L. Sharp, Loughborough, UK

A. E. Underhill, Bangor, UK

P. C. White, Glasgow, UK

ASSOCIATE SCIENTIFIC EDITORS

All ASEs are also members of the Editorial Board. Potential contributors wishing to discuss the scientific content of their paper(s) may contact appropriate members of this group.

Chairman

Professor James N. Miller, Department of Chemistry, Loughborough University of Technology, UK

E-mail j.n.miller@lboro.ac.uk

Dr Yngvar Thomassen, National Institute of Occupational Health, Oslo, Norway

E-mail yngvar.thomassen@stami.no

Professor Colin S. Creaser, Department of Chemistry and Physics, Nottingham Trent University, UK

E-mail colin.creaser@ntu.ac.uk

Professor Pankaj Vadgama, Department of Medicine, University of Manchester, UK

E-mail pvadgama@fs1.ho.man.ac.uk

Professor Malcolm R. Smyth, Department of Chemical Sciences, Dublin City University, Eire

E-mail smyth@ccmail.dcu.ie

INTERNATIONAL ADVISORY BOARD

N. W. Barnett, Victoria, Australia

K. D. Bartle, Leeds, UK

A. M. Bond, Victoria, Australia

R. G. Brereton, Bristol, UK

U. A. Th. Brinkman, Amsterdam, The Netherlands

A. C. Calokerinos, Athens, Greece

D. Diamond, Dublin, Eire

L. Ebdon, Plymouth, UK

H. Emons, Julich, Germany

J. P. Foley, Villanova, PA, USA

M. F. Giné, Sao Paulo, Brazil

L. Gorton, Lund, Sweden

K. Jinno, Toyohashi, Japan

L. Kolomiets, Moscow, Russia

H. K. Lee, Singapore

S. Lunte, Lawrence, KS, USA

F. Palmisano, Bari, Italy

J. Pawliszyn, Ontario, Canada

T. B. Pierce, Harwell, UK

J. Růžicka, Seattle, WA, USA

K. Štulík, Prague, Czech Republic

K. C. Thompson, Rotherham, UK

M. Thompson, Toronto, Canada

M. Valcárcel, Cordoba, Spain

J. Wang, Las Cruces, NM, USA

I. D. Wilson, Macclesfield, UK

EDITORIAL STAFF

Managing editor

Harpal S. Minhas

Staff editor

Sarah J. R. Williams

Editorial secretary

Linda Warnecke

Editorial production manager

Caroline J. Seeley

Deputy editor (production)

Ziva E. Whitelock

Technical editors

Stephen B. Wilkes

Secretary

Lesley Turney

INFORMATION FOR AUTHORS

Full details of how to submit material for publication in *Analytical Communications* are given in the Instructions to Authors in the January issue and are available on the web at <http://www.rsc.org/ancomm>. Separate copies are available on request. There is no page charge. Fifty reprints are supplied free of charge.

Manuscripts (three copies typed in double spacing) should be addressed to:

H. S. Minhas, Managing Editor,
The Royal Society of Chemistry,
Thomas Graham House, Science Park, Milton Road, Cambridge,
UK CB4 0WF
Tel (+44) (0) 1223 420066
Fax (+44) (0) 1223 420247

X

5

3

SUBJECT INDEX, 1998

ADENOSYL COBALAMIN

Detection of methyl cobalamin and adenosyl cobalamin using a nitroxide radical trap, 257

ADRENORECEPTOR

Selection of phage display combinatorial library peptides with affinity for a yohimbine imprinted methacrylate polymer, 3

AIR

Design of an automated analysis system for the determination of organic compounds in continuous air stream using solid-phase microextraction, 187

ALCOHOL

Retention and selectivity effects of coating octadecylsilica stationary phases with low molecular weight alcohols in reversed-phase liquid chromatography using water as mobile phase, 49

AMINO ACIDS

An on-column miniature conductivity cell and a photocouple separator for conductivity detection by capillary electrophoresis, 365

ANODIC STRIPPING VOLTAMMETRY

Studies of the application of overoxidised polypyrrole films in anodic stripping voltammetry, 61

ANTHRAQUINONE

Determination of anthraquinone in alkaline sodium dithionite solution by electrochemical analysis, 153

ATMOSPHERIC PRESSURE IONIZATION INTERFACE

Liquid chromatography-mass spectrometric analysis of phenylurea herbicides and their degradation products using an atmospheric pressure ionization interface, 91

ATOMIC ABSORPTION SPECTROMETRY

Behaviour of selenium compounds in FI-HG-AAS, 337

Optimization of microwave digestion for determination of selenium in human urine by flow injection-hydride generation-atomic absorption spectrometry, 361

AUTOMATED ANALYSIS

Design of an automated analysis system for the determination of organic compounds in continuous air stream using solid-phase microextraction, 187

BENZENE

Extraction of benzene, toluene, ethyl benzene, xylene and cumene from soil using methanol at elevated temperature and pressure, 173

BIOLOGICAL

Thickness shear mode acoustic assay for plasminogen activators, 25

Characterization of (24*R*)-24,25-dihydroxyvitamin D₃ monoglucuronides formed from a rat liver microsomal fraction using high-performance liquid chromatography and liquid chromatography-mass spectrometry, 33

Quantification of the D-(+)-enantiomer of phenylalanine in physiological fluids using high-performance liquid chromatography with column switching, 37

Behaviourally induced changes in extracellular levels of brain glutamate monitored at 1 s resolution with an implanted biosensor, 87

High resolution magic angle spinning ¹H nuclear magnetic resonance analysis of intact prostatic hyperplastic and tumour tissues, 113

On-flow identification of metabolites of paracetamol from human urine using directly coupled CZE-NMR and CEC-NMR spectroscopy, 213

BIOSENSOR

Sol-gel-derived nanocrystalline gold-silicate composite biosensor, 29

Behaviourally induced changes in extracellular levels of brain glutamate monitored at 1 s resolution with an implanted biosensor, 87

Enzymatic sensor based on conducting polymer coatings on metallised membranes, 245

Self-assembled silanes and the thiol functionalization of surfaces, 391

An enzyme flow immunoassay using alkaline phosphatase as the label and a tyrosinase biosensor as the label detector, 417

BUFFER

Comparison of three different microemulsion systems as the run buffer for the capillary electrophoretic separation of ketone test solutes, 289

CALCIUM

Comparison of the performance of calix[4]arene phosphine oxide and ester derivatives in ion-selective optode membranes, 127

CALIXARENES

Chiral resolution of the enantiomers of phenylglycinol using (5*S*)-di-naphthylprolinol calix[4]arene by capillary electrophoresis and fluorescence spectroscopy, 123

Comparison of the performance of calix[4]arene phosphine oxide and ester derivatives in ion-selective optode membranes, 127

CAPILLARY ELECTROCHROMATOGRAPHY

Separation of pharmaceutical bases from neutral and acidic components by capillary electrochromatography, 217

CAPILLARY ELECTROPHORESIS

Chiral resolution of the enantiomers of phenylglycinol using

(5*S*)-di-naphthylprolinol calix[4]arene by capillary electrophoresis and

fluorescence spectroscopy, 123

Development and characterization of an integrated on-capillary tubular electrode for capillary electrophoresis/electrochemistry, 209

Combined thermal field-flow fractionation-capillary electrophoresis, 229

Comparison of three different microemulsion systems as the run buffer for the capillary electrophoretic separation of ketone test solutes, 289

An improved apparatus for on-line chemiluminescence detection with capillary electrophoresis and detection of metal-porphyrins, 293

Portable capillary electrophoresis instrument with potentiometric detection, 325

Solid phase microextraction coupled to capillary electrophoresis, 353

An on-column miniature conductivity cell and a photocouple separator for conductivity detection by capillary electrophoresis, 365

Possibility of kinetics studies in gradient capillary electrophoresis, 411

Capillary electrophoresis coupled to electrochemical detection: a review of recent advances, 1H

CAPILLARY ZONE ELECTROPHORESIS

On-flow identification of metabolites of paracetamol from human urine using directly coupled CZE-NMR and CEC-NMR spectroscopy, 213

Separation of naphthalenesulfonate isomers by capillary zone electrophoresis using macrocyclic polyamines as additive for running solution, 221

CERAMIDES

Thermal degradation of ceramides as studied by mass spectrometry and vibrational spectroscopy, 161

CHEMICAL SENSOR

Reagent delivery systems based on soluble polymers capable of implementing sequential chemical reactions for spectroscopic chemical sensors and dry reagent devices, 93

CHEMILUMINESCENCE

Luminol-free chlorine chemiluminescence in an oil-in-water microemulsion medium, 67

An improved apparatus for on-line chemiluminescence detection with capillary electrophoresis and detection of metal-porphyrins, 293

Continuous monitoring method for organic pollutants in water based on chemiluminescence reaction with potassium permanganate, 307

FIA determination of Cr^{III} in tap water with chemiluminescence detection, 389

CHIRAL RESOLUTION

Chiral resolution of the enantiomers of phenylglycinol using (5*S*)-di-naphthylprolinol calix[4]arene by capillary electrophoresis and fluorescence spectroscopy, 123

CHIRAL SEPARATION

Molecularly imprinted polymer combinatorial libraries for multiple simultaneous chiral separations, 285

CHLORINE

Luminol-free chlorine chemiluminescence in an oil-in-water microemulsion medium, 67

CHROMIUM

FIA determination of Cr^{III} in tap water with chemiluminescence detection, 389

CHROMOGENIC SUBSTRATE

Sensitive chromogenic substrate for detecting peroxidase activity, 179

CLINICAL

Water-soluble chromogenic reagent for colorimetric detection of hydrogen peroxide—an alternative to 4-aminoantipyrine working at a long wavelength, 71

COLLABORATIVE TRIALS

Estimating measurement uncertainty using a cause and effect and reconciliation approach. Part 2. Measurement uncertainty estimates compared with collaborative trial expectation, 377

COLORIMETRY

Water-soluble chromogenic reagent for colorimetric detection of hydrogen peroxide—an alternative to 4-aminoantipyrine working at a long wavelength, 71

COMBINATORIAL CHEMISTRY

Selection of phage display combinatorial library peptides with affinity for a yohimbine imprinted methacrylate polymer, 3

Screening of a combinatorial steroid library using molecularly imprinted polymers, 9

COMBINATORIAL LIBRARY

Molecularly imprinted polymer combinatorial libraries for multiple simultaneous chiral separations, 285

CONDUCTIVITY CELL

An on-column miniature conductivity cell and a photocouple separator for conductivity detection by capillary electrophoresis, 365

CORRELATION ANALYSIS

Correlation analysis of fluctuations and continuous observation of electrophoresis, 301

CUMENE

Extraction of benzene, toluene, ethyl benzene, xylene and cumene from soil using methanol at elevated temperature and pressure, 173

DEXAMETHASONE

A rapid on-filter immunoassay screen for dexamethasone in equine urine, 249

DNA

DNA analysis with scanning probe microscopy, 5H

DRUG

Mass median particle size determination of an active compound in a binary mixture using near-infrared spectroscopy, 133

On-flow identification of metabolites of paracetamol from human urine using directly coupled CZE-NMR and CEC-NMR spectroscopy, 213

Preliminary investigation of heroin fingerprinting using trace element concentrations, 403

DYE

Determination of anthraquinone in alkaline sodium dithionite solution by electrochemical analysis, 153

The isolation and identification of dyes in aqueous media by solid phase extraction-Fourier transform-Raman spectroscopy (SPERS), 297

ELECTRIC DOUBLE LAYER

Laser electrophoresis in surface electric double layer, 369

ELECTROCHEMISTRY

Sol-gel-derived nanocrystalline gold-silicate composite biosensor, 29

Simultaneous application of spline wavelet and Riemann-Liouville transform filtration in electroanalytical chemistry, 57

Determination of anthraquinone in alkaline sodium dithionite solution by electrochemical analysis, 153

Electrochemical flow sensor for *in-situ* monitoring of total metal concentrations, 241

Capillary electrophoresis coupled to electrochemical detection: a review of recent advances, 1H

ELECTROCHROMATOGRAPHY

Chiral electrochromatography with a 'moulded' rigid monolithic capillary column, 83

ELECTRODE

Development and characterization of an integrated on-capillary tubular electrode for capillary electrophoresis/electrochemistry, 209

Mercury-free anodic stripping voltammetry of lead ions using a PVS-doped polyaniline modified glassy carbon electrode, 345

A tungsten oxide coated wire electrode used as a pH sensor in flow injection potentiometry, 395

Quartz crystal microbalance with gold electrodes as a sensor for monitoring gas-phase adsorption/desorption of short chain alkylthiol and alkyl sulfides, 415

ELECTRON IONIZATION

Chiral recognition of cellulose tris(5-fluoro-2-methylphenylcarbamate) toward (*R*)- and (*S*)-1,1'-bi-2-naphthol detected by electron ionization mass spectrometry, 63

ELECTROPHORESIS

Correlation analysis of fluctuations and continuous observation of electrophoresis, 301

ELECTROSTATIC ION CHROMATOGRAPHY

Electrostatic ion chromatography using dilute electrolytes as eluents: a new method for separation of anions, 317

ENVIRONMENTAL

Extraction of benzene, toluene, ethyl benzene, xylene and cumene from soil using methanol at elevated temperature and pressure, 173

Continuous monitoring method for organic pollutants in water based on chemiluminescence reaction with potassium permanganate, 307

ENZYME

Simultaneous determination of denatured proteins by hydrophobic interaction chromatography, 399

ENZYME IMMUNOASSAY

Sensitive chromogenic substrate for detecting peroxidase activity, 179

Enzyme immunoassay for the determination of the insecticide fenoxycarb, 183

An enzyme flow immunoassay using alkaline phosphatase as the label and a tyrosinase biosensor as the label detector, 417

EXTENDED X-RAY ABSORPTION FINE STRUCTURE

Extraction of extended X-ray absorption fine structure information from the experimental data using the wavelet transform, 135

EXTRACTION

Novel extraction of metal ions from acidic media using poly(ethylene oxide) phases, 145

Extraction of benzene, toluene, ethyl benzene, xylene and cumene from soil using methanol at elevated temperature and pressure, 173

FENOXYCARB

Enzyme immunoassay for the determination of the insecticide fenoxycarb, 183

FIELD FLOW FRACTIONATION

Combined thermal field-flow fractionation-capillary electrophoresis, 229

FLOW ANALYSIS

Pulsed flow chemistry. A new approach to the generation of concentration profiles in flow analysis, 97

FLOW INJECTION

Determination of zirconium with Xylenol Orange by flow injection spectrophotometry: application to eluates from technetium-99m generators, 107

Behaviour of selenium compounds in FI-HG-AAS, 337

Optimization of microwave digestion for determination of selenium in human urine by flow injection-hydride generation-atomic absorption spectrometry, 361

FIA determination of Cr^{III} in tap water with chemiluminescence detection, 389

A tungsten oxide coated wire electrode used as a pH sensor in flow injection potentiometry, 395

FLUORESCENCE

Chiral resolution of the enantiomers of phenylglycinol using (*S*)-di-naphthylprolinol calix[4]arene by capillary electrophoresis and fluorescence spectroscopy, 123

Detection of nitric oxide and nitrite by using a Rhodamine-type fluorescent indicator, 195

FORMALDEHYDE

Effect of relative humidity on the determination of formaldehyde with the NIOSH 3500 method (chromotropic acid method), 103

FOURIER TRANSFORM RAMAN SPECTROSCOPY

The isolation and identification of dyes in aqueous media by solid phase extraction-Fourier transform-Raman spectroscopy (SPERS), 297

FRIT

The fabrication of micro-porous silica structures for micro-reactor technology, 341

GAS CHROMATOGRAPHY

Determination of phosphine by packed column gas chromatography with alkali flame ionisation detection, 109

Extraction of benzene, toluene, ethyl benzene, xylene and cumene from soil using methanol at elevated temperature and pressure, 173

Speciation of mercury by ICP-MS after on-line capillary cryofocussing and ambient temperature multicapillary gas chromatography, 331

GEOLOGICAL

Comminution of geological samples using Syalon based milling vessels: comparison with established sample preparation methods, 75

GLOW DISCHARGE

The potential of a modified rf glow discharge source for enhanced elemental speciation studies, 281

GLUTAMATE

Behaviourally induced changes in extracellular levels of brain glutamate monitored at 1 s resolution with an implanted biosensor, 87

HERBICIDE

Liquid chromatography-mass spectrometric analysis of phenylurea herbicides and their degradation products using an atmospheric pressure ionization interface, 91

HIGH-PERFORMANCE LIQUID CHROMATOGRAPHY

Characterization of (24*R*)-24,25-dihydroxyvitamin D₃ monoglucuronides formed from a rat liver microsomal fraction using high-performance liquid chromatography and liquid chromatography-mass spectrometry, 33

Quantification of the *D*-(+)-enantiomer of phenylalanine in physiological fluids using high-performance liquid chromatography with column switching, 37

Extraction of benzene, toluene, ethyl benzene, xylene and cumene from soil using methanol at elevated temperature and pressure, 173

HIGHLIGHT

Capillary electrophoresis coupled to electrochemical detection: a review of recent advances, 1H

DNA analysis with scanning probe microscopy, 5H

Developments in membrane inlet mass spectrometry, 9H

Molecular imprints as sorbents for solid phase extraction: potential and applications, 13H

HORWITZ FUNCTION

Estimating measurement uncertainty using a cause and effect and reconciliation approach. Part 2. Measurement uncertainty estimates compared with collaborative trial expectation, 377

HYDRIDE GENERATION

Behaviour of selenium compounds in FI-HG-AAS, 337

Optimization of microwave digestion for determination of selenium in human urine by flow injection-hydride generation-atomic absorption spectrometry, 361

HYDROGEN PEROXIDE

Development of an amperometric sensor for the continuous and in-line measurement of hydrogen peroxide concentration in textile bleaching baths, 21

Water-soluble chromogenic reagent for colorimetric detection of hydrogen peroxide—an alternative to 4-aminoantipyrine working at a long wavelength, 71

HYDROPHOBIC INTERACTION CHROMATOGRAPHY

Simultaneous determination of denatured proteins by hydrophobic interaction chromatography, 399

IMMUNOASSAY

Thickness shear mode acoustic assay for plasminogen activators, 25

A rapid on-filter immunoassay screen for dexamethasone in equine urine, 249

INDUCTIVELY COUPLED PLASMA

Miniaturisation of a matrix separation/preconcentration procedure for inductively coupled plasma mass spectrometry, 177

Speciation of mercury by ICP-MS after on-line capillary cryofocussing and ambient temperature multicapillary gas chromatography, 331

Preliminary investigation of heroin fingerprinting using trace element concentrations, 403

INFRARED SPECTROSCOPY

Mass median particle size determination of an active compound in a binary mixture using near-infrared spectroscopy, 133
Analysis of oil in water at the low ppm level using direct supercritical fluid extraction coupled on-line with infrared spectroscopy, 277

INSECTICIDE

Enzyme immunoassay for the determination of the insecticide fenoxycarb, 183

ION CHROMATOGRAPHY

Determination of trace uranyl in saline samples using chelation ion chromatography, 13
Separation of metal ions using a polymeric reversed-phase column and a Methylthymol Blue containing mobile phase, 17
Electrostatic ion chromatography using dilute electrolytes as eluents: a new method for separation of anions, 317

ION-SELECTIVE OPTODE MEMBRANES

Comparison of the performance of calix[4]arene phosphine oxide and ester derivatives in ion-selective optode membranes, 127

KINETICS

Possibility of kinetics studies in gradient capillary electrophoresis, 411

LASER ELECTROPHORESIS

Laser electrophoresis in surface electric double layer, 369

LEAD

Mercury-free anodic stripping voltammetry of lead ions using a PVS-doped polyaniline modified glassy carbon electrode, 345

LIQUID CHROMATOGRAPHY

Retention and selectivity effects of coating octadecylsilica stationary phases with low molecular weight alcohols in reversed-phase liquid chromatography using water as mobile phase, 49
Liquid chromatography-mass spectrometric analysis of phenylurea herbicides and their degradation products using an atmospheric pressure ionization interface, 91
New three-phase model for micellar liquid chromatography, 191
Mixture-design approach to retention prediction using the solvation parameter model and ternary solvent systems in reversed-phase liquid chromatography, 253

MASS SPECTROMETRY

Characterization of (24*R*)-24,25-dihydroxyvitamin D₃ monoglucuronides formed from a rat liver microsomal fraction using high-performance liquid chromatography and liquid chromatography-mass spectrometry, 33

Chiral recognition of cellulose tris(5-fluoro-2-methylphenylcarbamate) toward (*R*)- and (*S*)-1,1'-bi-2-naphthol detected by electron ionization mass spectrometry, 63

Liquid chromatography-mass spectrometric analysis of phenylurea herbicides and their degradation products using an atmospheric pressure ionization interface, 91

Thermal degradation of ceramides as studied by mass spectrometry and vibrational spectroscopy, 161

Miniaturisation of a matrix separation/preconcentration procedure for inductively coupled plasma mass spectrometry, 177

Speciation of mercury by ICP-MS after on-line capillary cryofocussing and ambient temperature multicapillary gas chromatography, 331

Preliminary investigation of heroin fingerprinting using trace element concentrations, 403

Developments in membrane inlet mass spectrometry, 9H

MATHEMATICS

Simultaneous application of spline wavelet and Riemann-Liouville transform filtration in electroanalytical chemistry, 57

Correlation analysis of fluctuations and continuous observation of electrophoresis, 301

MEASUREMENT UNCERTAINTY

Estimating measurement uncertainty using a cause and effect and reconciliation approach. Part 2. Measurement uncertainty estimates compared with collaborative trial expectation, 377

MEMBRANE INLET

Developments in membrane inlet mass spectrometry, 9H

MERCURY

Speciation of mercury by ICP-MS after on-line capillary cryofocussing and ambient temperature multicapillary gas chromatography, 331

METAL

Electrochemical flow sensor for *in-situ* monitoring of total metal concentrations, 241

METALLOPORPHYRIN

Molecularly imprinted receptor having metalloporphyrin-based signaling binding site, 225

METHYL COBALAMIN

Detection of methyl cobalamin and adenosyl cobalamin using a nitroxide radical trap, 257

MICELLAR LIQUID CHROMATOGRAPHY

New three-phase model for micellar liquid chromatography, 191

MICROEMULSION

Comparison of three different microemulsion systems as the run buffer for the capillary electrophoretic separation of ketone test solutes, 289

MICROEXTRACTION

Solid phase microextraction coupled to capillary electrophoresis, 353

MICROWAVE DIGESTION

Optimization of microwave digestion for determination of selenium in human urine by flow injection-hydride generation-atomic absorption spectrometry, 361

MINIATURIZATION

An on-column miniature conductivity cell and a photocouple separator for conductivity detection by capillary electrophoresis, 365

MOBILE PHASE

Retention and selectivity effects of coating octadecylsilica stationary phases with low molecular weight alcohols in reversed-phase liquid chromatography using water as mobile phase, 49

MOLECULAR IMPRINT

Molecular imprints as sorbents for solid phase extraction: potential and applications, 13H

MOLECULARLY IMPRINTED RECEPTOR

Molecularly imprinted receptor having metalloporphyrin-based signaling binding site, 225

MONOLITHIC CAPILLARY COLUMN

Chiral electrochromatography with a 'moulded' rigid monolithic capillary column, 83

MULTIPLE UNIVARIATE SYMBOLIC CONTROL CHART

Multiple univariate symbolic control chart for internal quality control of analytical data, 205

NAPHTHALENESULFONATES

Separation of naphthalenesulfonate isomers by capillary zone electrophoresis using macrocyclic polyamines as additive for running solution, 221

NITRIC OXIDE

Detection of nitric oxide and nitrite by using a Rhodamine-type fluorescent indicator, 195

NITRITE

Detection of nitric oxide and nitrite by using a Rhodamine-type fluorescent indicator, 195

NUCLEAR MAGNETIC RESONANCE

High resolution magic angle spinning ¹H nuclear magnetic resonance analysis of intact prostatic hyperplastic and tumour tissues, 113
On-flow identification of metabolites of paracetamol from human urine using directly coupled CZE-NMR and CEC-NMR spectroscopy, 213

OIL

Analysis of oil in water at the low ppm level using direct supercritical fluid extraction coupled on-line with infrared spectroscopy, 277

PARACETAMOL

On-flow identification of metabolites of paracetamol from human urine using directly coupled CZE-NMR and CEC-NMR spectroscopy, 213

PARTICLE SIZE

Mass median particle size determination of an active compound in a binary mixture using near-infrared spectroscopy, 133

PEPTIDE

Selection of phage display combinatorial library peptides with affinity for a yohimbine imprinted methacrylate polymer, 3

PEROXIDASE

Sensitive chromogenic substrate for detecting peroxidase activity, 179

PESTICIDE

Liquid chromatography-mass spectrometric analysis of phenylurea herbicides and their degradation products using an atmospheric pressure ionization interface, 91

PH

A tungsten oxide coated wire electrode used as a pH sensor in flow injection potentiometry, 395

PHARMACEUTICAL

Supercritical fluid extraction and supercritical fluid chromatography of vitamin E in pharmaceutical preparations, 53

Separation of pharmaceutical bases from neutral and acidic components by capillary electrochromatography, 217

PHENYLALANINE

Quantification of the D-(+)-enantiomer of phenylalanine in physiological fluids using high-performance liquid chromatography with column switching, 37

PHOSPHINE

Determination of phosphine by packed column gas chromatography with alkali flame ionisation detection, 109

PLASMINOGEN ACTIVATOR

Thickness shear mode acoustic assay for plasminogen activators, 25

POLLUTANTS

Continuous monitoring method for organic pollutants in water based on chemiluminescence reaction with potassium permanganate, 307

POLY(ETHYLENE OXIDE)

Novel extraction of metal ions from acidic media using poly(ethylene oxide) phases, 145

POLYAMINES

Separation of naphthalenesulfonate isomers by capillary zone electrophoresis using macrocyclic polyamines as additive for running solution, 221

POLYCYCLIC AROMATIC HYDROCARBON

Stability of trace organic substances in water: data obtained from interlaboratory tests, 373

POLYMER

Selection of phage display combinatorial library peptides with affinity for a yohimbine imprinted methacrylate polymer, 3

- Screening of a combinatorial steroid library using molecularly imprinted polymers, 9
- Separation of metal ions using a polymeric reversed-phase column and a Methylthymol Blue containing mobile phase, 17
- Reagent delivery systems based on soluble polymers capable of implementing sequential chemical reactions for spectroscopic chemical sensors and dry reagent devices, 93
- Enzymatic sensor based on conducting polymer coatings on metallised membranes, 245
- Molecularly imprinted polymer combinatorial libraries for multiple simultaneous chiral separations, 285
- POLYPYRROLE FILM**
- Studies of the application of overoxidised polypyrrole films in anodic stripping voltammetry, 61
- PORPHYRINS**
- An improved apparatus for on-line chemiluminescence detection with capillary electrophoresis and detection of metal-porphyrins, 293
- POTENTIOMETRY**
- Portable capillary electrophoresis instrument with potentiometric detection, 325
- A tungsten oxide coated wire electrode used as a pH sensor in flow injection potentiometry, 395
- PROCESS ANALYSIS**
- Development of an amperometric sensor for the continuous and in-line measurement of hydrogen peroxide concentration in textile bleaching baths, 21
- PROTEIN**
- Simultaneous determination of denatured proteins by hydrophobic interaction chromatography, 399
- PULSED FLOW**
- Pulsed flow chemistry. A new approach to the generation of concentration profiles in flow analysis, 97
- QUALITY CONTROL**
- Multiple univariate symbolic control chart for internal quality control of analytical data, 205
- QUARTZ CRYSTAL MICROBALANCE**
- Quartz crystal microbalance with gold electrodes as a sensor for monitoring gas-phase adsorption/desorption of short chain alkylthiol and alkyl sulfides, 415
- RADICAL TRAP**
- Detection of methyl cobalamin and adenosyl cobalamin using a nitroxide radical trap, 257
- REAGENT**
- Water-soluble chromogenic reagent for colorimetric detection of hydrogen peroxide—an alternative to 4-aminopyridine working at a long wavelength, 71
- RELATIVE HUMIDITY**
- Effect of relative humidity on the determination of formaldehyde with the NIOSH 3500 method (chromatographic acid method), 103
- REVIEW**
- DNA analysis with scanning probe microscopy, 5H
- RIEMANN-LIOUVILLE TRANSFORM**
- Simultaneous application of spline wavelet and Riemann-Liouville transform filtration in electroanalytical chemistry, 57
- SALINE**
- Determination of trace uranyl in saline samples using chelation ion chromatography, 13
- SAMPLE HANDLING**
- Miniaturisation of a matrix separation/preconcentration procedure for inductively coupled plasma mass spectrometry, 177
- SAMPLE PREPARATION**
- Comminution of geological samples using Syalon based milling vessels: comparison with established sample preparation methods, 75
- SCANNING PROBE MICROSCOPY**
- DNA analysis with scanning probe microscopy, 5H
- SELENIUM**
- Behaviour of selenium compounds in FI-HG-AAS, 337
- Optimization of microwave digestion for determination of selenium in human urine by flow injection-hydride generation-atomic absorption spectrometry, 361
- SENSOR**
- Development of an amperometric sensor for the continuous and in-line measurement of hydrogen peroxide concentration in textile bleaching baths, 21
- Sol-gel-derived nanocrystalline gold-silicate composite biosensor, 29
- Reagent delivery systems based on soluble polymers capable of implementing sequential chemical reactions for spectroscopic chemical sensors and dry reagent devices, 93
- Electrochemical flow sensor for *in-situ* monitoring of total metal concentrations, 241
- Enzymatic sensor based on conducting polymer coatings on metallised membranes, 245
- A tungsten oxide coated wire electrode used as a pH sensor in flow injection potentiometry, 395
- Quartz crystal microbalance with gold electrodes as a sensor for monitoring gas-phase adsorption/desorption of short chain alkylthiol and alkyl sulfides, 415
- SEQUENTIAL INJECTION**
- Automated solid phase extraction of theophylline by sequential injection on renewable column, 357
- SILANES**
- Self-assembled silanes and the thiol functionalization of surfaces, 391
- SILICA**
- Sorption characteristics of a wide pore, butylsiloxane-bonded silica sorbent for solid-phase extraction, 147
- The fabrication of micro-porous silica structures for micro-reactor technology, 341
- SODIUM**
- Comparison of the performance of calix[4]arene phosphine oxide and ester derivatives in ion-selective optode membranes, 127
- SOIL**
- Extraction of benzene, toluene, ethyl benzene, xylene and cumene from soil using methanol at elevated temperature and pressure, 173
- SOL-GEL**
- Sol-gel-derived nanocrystalline gold-silicate composite biosensor, 29
- SOLID-PHASE EXTRACTION**
- Sorption characteristics of a wide pore, butylsiloxane-bonded silica sorbent for solid-phase extraction, 147
- Solid phase microextraction coupled to capillary electrophoresis, 353
- Automated solid phase extraction of theophylline by sequential injection on renewable column, 357
- Molecular imprints as sorbents for solid phase extraction: potential and applications, 13H
- SOLID-PHASE MICROEXTRACTION**
- Design of an automated analysis system for the determination of organic compounds in continuous air stream using solid-phase microextraction, 187
- SOLVATION**
- Mixture-design approach to retention prediction using the solvation parameter model and ternary solvent systems in reversed-phase liquid chromatography, 253
- SOLVENT**
- Stability of trace organic substances in water: data obtained from interlaboratory tests, 373
- SORBENT**
- Sorption characteristics of a wide pore, butylsiloxane-bonded silica sorbent for solid-phase extraction, 147
- Molecular imprints as sorbents for solid phase extraction: potential and applications, 13H
- SORPTION**
- Sorption characteristics of a wide pore, butylsiloxane-bonded silica sorbent for solid-phase extraction, 147
- SPECIATION**
- The potential of a modified rf glow discharge source for enhanced elemental speciation studies, 281
- SPLINE WAVELET**
- Simultaneous application of spline wavelet and Riemann-Liouville transform filtration in electroanalytical chemistry, 57
- STEEL**
- The measurement of tritium in steel, 157
- STERIOD**
- Screening of a combinatorial steroid library using molecularly imprinted polymers, 9
- SULFIDE**
- Quartz crystal microbalance with gold electrodes as a sensor for monitoring gas-phase adsorption/desorption of short chain alkylthiol and alkyl sulfides, 415
- SUPERCritical FLUID CHROMATOGRAPHY**
- Supercritical fluid extraction and supercritical fluid chromatography of vitamin E in pharmaceutical preparations, 53
- SUPERCritical FLUID EXTRACTION**
- Supercritical fluid extraction and supercritical fluid chromatography of vitamin E in pharmaceutical preparations, 53
- Analysis of oil in water at the low ppm level using direct supercritical fluid extraction coupled on-line with infrared spectroscopy, 277
- TECHNETIUM**
- Determination of zirconium with Xylenol Orange by flow injection spectrophotometry: application to eluates from technetium-99m generators, 107
- THIN FILM**
- Self-assembled silanes and the thiol functionalization of surfaces, 391
- TOLUENE**
- Extraction of benzene, toluene, ethyl benzene, xylene and cumene from soil using methanol at elevated temperature and pressure, 173
- TRACE ANALYSIS**
- Preliminary investigation of heroin fingerprinting using trace element concentrations, 403
- TRIALOMETHANES**
- Stability of trace organic substances in water: data obtained from interlaboratory tests, 373
- TRITIUM**
- The measurement of tritium in steel, 157
- URANYL**
- Determination of trace uranyl in saline samples using chelation ion chromatography, 13

URINE

- On-flow identification of metabolites of paracetamol from human urine using directly coupled CZE-NMR and CEC-NMR spectroscopy, 213
 Optimization of microwave digestion for determination of selenium in human urine by flow injection-hydride generation-atomic absorption spectrometry, 361

VIBRATIONAL SPECTROSCOPY

- Thermal degradation of ceramides as studied by mass spectrometry and vibrational spectroscopy, 161

VITAMIN E

- Supercritical fluid extraction and supercritical fluid chromatography of vitamin E in pharmaceutical preparations, 53

VOLTAMMETRY

- Mercury-free anodic stripping voltammetry of lead ions using a PVS-doped polyaniline modified glassy carbon electrode, 345

WATER

- Determination of trace uranyl in saline samples using chelation ion chromatography, 13
 Luminol-free chlorine chemiluminescence in an oil-in-water microemulsion medium, 67
 Analysis of oil in water at the low ppm level using direct supercritical fluid extraction coupled on-line with infrared spectroscopy, 277

- Continuous monitoring method for organic pollutants in water based on chemiluminescence reaction with potassium permanganate, 307

- Stability of trace organic substances in water: data obtained from interlaboratory tests, 373

- FIA determination of Cr^{III} in tap water with chemiluminescence detection, 389

WAVELET TRANSFORM

- Extraction of extended X-ray absorption fine structure information from the experimental data using the wavelet transform, 135

XYLENE

- Extraction of benzene, toluene, ethyl benzene, xylene and cumene from soil using methanol at elevated temperature and pressure, 173

XYLENOL ORANGE

- Determination of zirconium with Xylenol Orange by flow injection spectrophotometry: application to eluates from technetium-99m generators, 107

ZIRCONIUM

- Determination of zirconium with Xylenol Orange by flow injection spectrophotometry: application to eluates from technetium-99m generators, 107
